DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

- a. Group 1, claim(s) 1-48, drawn to a method and device for generating successive round keys of an expanded key for use in an encryption and/or decryption engine where previously generated words of the expanded key are cyclically overwritten in order to save memory.
- b. Group 2, claim(s) 49-52, drawn to an AES round constant function generator having a register and control inputs for controlling the shifting of the register contents.

Groups 1 and 2 do not have a unity of invention *a priori* for the following reasons:

2. Group 1 has the technical feature of generating keys by cyclically overwriting previously generated words of an expanded key in order to save memory.
3. Group 2 has the technical feature of controlling the shifting of contents in a register using control inputs.

4. Therefore, Group 1 and Group 2 of the instant case do not have a unity of invention because they do not share a general inventive concept. While Group 2 is relates to a function generator having a shift register that can be used in AES encryption/decryption operations, it does not recite the feature of generating keys by overwriting previously generated words of an expanded key in order to save memory. Furthermore, while Group 1 relates to a method and device for generating keys for AES encryption/decryption, it does not recite using input controls in order to control the shifting in a register for use in AES encryption/decryption.
5. Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
